WITH
C&S ELECTRIC LIMITED
AND
THEIR RESPECTIVE SHAREHOLDERS & CREDITORS**

Preamble and objectives

This Scheme of Amalgamation envisages amalgamation of JVA Trading Private Limited (hereinafter referred to as “JTPL” or “Transferor Company” or “Amalgamating Company”) with C&S Electric Limited (hereinafter referred to as “C&S” or “the Transferee Company” or “Amalgamated Company”) and other matters consequential, supplemental, incidental and/or otherwise integrally connected therewith pursuant to Sections 230 to 232 and other applicable provisions of Companies Act, 2013, as may be applicable.

- (a) **Incorporation:** C&S was incorporated on June 15, 1971 under the Companies Act, 1956. Its registered office is situated at 222, Okhla Industrial Estate, New Delhi 110 020. B. Rationale of the Scheme of Amalgamation

- 1.1 The entire issued, subscribed and paid-up share capital of JTPL and 99.29% of the issued, subscribed and paid-up share capital C&S is held by the same Promoters. Further, both the companies are engaged in the similar line of business. While C&S is engaged in manufacturing of electrical and electronic products, JTPL facilitates trade of goods manufactured by C&S, i.e. businesses of both JTPL and C&S are complementary to each other.
- 1.2 Accordingly, the board of directors of Transferor Company and the Transferee Company have decided to merge Transferor Company together with its business and undertakings, with the Transferee Company, so as to achieve, *inter alia*, the following:
 - (a) Creation of a single robust entity in the form of “C&S” which would carry out businesses those are integrated and complementary in nature. The synergies that exist between the entities in terms of dealing in similar products, processes and resources can be put to the best advantage of all stakeholders;
 - (b) Simplified group and business structure and elimination of multiplicity of companies leading to synergies in operations, more focused operational efforts, standardization and simplification of business of processes and productivity improvements, achieving efficiencies and economies of scale and reduction in operational costs, overheads, administrative and other expenditure;
 - (c) Greater size, scale, integration and flexibility for the amalgamated entity;
 - (d) The amalgamated entity will benefit from improved organizational capabilities and leadership, arising from the combination of people from the Transferor and Transferee Company respectively who have diverse skills, talent and vast experience to compete successfully in an increasingly competitive industry.
 - (e) Enable regulatory / procedural compliances being made by a single unified company, thus resulting in cost saving and saving in fees / duties which were otherwise being paid separately by each of the two companies for making various statutory and regulatory compliances;
- 1.3 Thus, as a whole, amalgamation of Transferor Company with the Transferee Company in terms of the Scheme will be beneficial for both the Transferor Company as well as the Transferee Company and their respective shareholders, creditors, employees and all others concerned with such companies.

2. ABOUT US

Amrit Paul Singla & Associates is a leading firm with vast experience in providing services covering assurance, tax, advisory and other financial advisory services. The firm's registration no. is 14199N. The firm has experienced partners and experienced staff to provide quality services to the clients.

3. VALUATION CONSIDERATIONS

3.1 OVERVIEW

We have been requested to provide assistance to conduct business valuation of the entities involved and compute fair value of equity shares. As such, this report lists out:

- The underlying factors considered for conducting valuation;
- Assumptions and adjustments considered for arriving at fair value;
- Computation process adopted; and
- Final valuation of equity shares arrived at by us.

The information contained in this report is absolutely confidential and is meant to be used solely by the client. Our valuation engagement is based on relevant information made available by the management and limited industry related information collected and analysed by us. Our report is subject to 'Assumptions and Limiting Conditions' included elsewhere in this report. The report presents the data, assumptions, approaches and methodologies employed in developing our recommended share price value.

3.2 VALUATION DATE

The valuation date is a specific point in time as of which the valuer's opinion of value applies. As such, the valuation date for this engagement is taken as 30th Nov 2016 for C&S Electric and accordingly future projections have been used. The valuation of JVA Trading is based on the latest available balance sheet data provided to us by the management, which is dated end of 30th Nov 2016.

3.3 VALUATION BASES (STANDARD OF VALUE)

As per Corporate Affairs Standard CAS-1 (issued by the Institute of Chartered Accountants of India), standard of value means the indication of the type of value being used in a specific engagement. Business interests are valued in a variety of contexts and for a variety of purposes. Different standards of value may lead to different conclusions of 'value'.

For the purpose of this engagement, the standard of value for the equity shares valuation has been taken as '*fair value of equity share*'. We have used Discounted Cash Flow (DCF) methodology and Net Asset Value (NAV) methodology of valuation for estimating the fair value.

3.4 VALUATION PREMISE

Determining the business value depends upon the situation in which the business is valued, i.e., what is likely to happen to the business beyond the valuation date influences what the business is worth today. As per CAS-1, the premise of value describes the type of market conditions the seller of the business interest might reasonably encounter. For the purpose of this engagement, the standard of value for the equity shares valuation has been arrived on the basis of 'going concern' assumption/premise.

3.5 ASSUMPTIONS AND LIMITING CONDITIONS

The assumptions and limiting conditions under which this engagement has been performed form a crucial part of this valuation report. The assumptions and limiting conditions that apply to current business valuation are listed below:

- This valuation reflects facts and conditions existing or reasonably foreseeable at the valuation date.
- Public information, estimates, industry and statistical information contained in this report have been obtained from sources considered to be reliable. However, we independently did not verify such information and make no representation as to the accuracy or completeness of such information obtained from or provided by such sources.

- Financial information of the company is included solely to assist in the development of a value conclusion presented in this report. Because of the limited purpose of the information presented, it may contain departures from generally accepted accounting principles.
- We do not provide assurance on the achievability of the results forecasted by the client because events and circumstances frequently do not occur as expected; differences between actual and expected results may be material; and achievement of the forecasted results is dependent on actions, plans, and assumptions of management.

- Neither all nor any part of the contents of this report shall be disseminated to the public through advertising, public relations, news, sales, or other media without our prior written consent and approval.

4. VALUATION METHODOLOGY

We have valued the company using the following methodologies:

- Discounted Cash Flow methodology; and
- Net Asset Value methodology

4.1 DISCOUNTED CASH FLOW (DCF) VALUATION

DCF is one of the most popular approaches employed having its roots in the time value of money concept. DCF approach values a company by discounting the future expected cash flows. For the purpose of this engagement, we have estimated future cash flows based on '**Free Cash Flows to Firm**' (FCFF) approach. The cash flows for the projected period under FCFF are computed as under:

FCFF	=	Net Operating Profit After Tax [+] Non cash expenses (including depreciation & amortisation) [+/-] Changes in working capital [-] Capital expenditure
------	---	--

4.2 NET ASSET VALUE (NAV) APPROACH

Under NAV approach, the business valuation is based on the estimated value of the business assets. In NAV model, the total assets value is reduced by the liabilities amount to arrive at net value which forms the basis for equity valuation of the company.

4.3 COST OF CAPITAL

Under the DCF approach, the free cash flows are discounted at weighted average cost of capital (WACC). WACC is the combination of cost of equity and cost of debt by assigning appropriate weights.

The methodology to compute cost of equity, post-tax cost of debt and weighted average cost of capital is as under:

- **Cost of equity** (Ke) is the expected return on equity investment. Using the Capital Asset Pricing Model (CAPM), cost of equity is computed as:

$$\text{Cost of equity} = \text{Risk free rate } (R_f) + \text{Beta} * \text{Equity Market Risk Premium}$$

- **R_f** is the return earned on a risk free asset.
- **Beta** is the volatility of company's return vis-à-vis the market. It is a measure of the additional risk of investing in a company.
- **Equity market risk premium** is the additional return for investing in the equity market. This is defined as the difference between average returns on stocks and average returns on risk free securities over the measurement period.

- **Cost of debt (Kd)** is the tax adjusted average interest cost on debt.
- **WACC** is computed as: $(K_e \times \text{Equity Proportion}) + (K_d \times \text{Debt Proportion})$

In the current valuation, we have computed cost of capital by considering the following inputs for C&S Electric:

Table 2: Cost of Capital Computation

Discount Rate Computation - C&S Electric Ltd.	
Risk free rate	6.2%
Beta factor	1.39
Expected return from market	15.9%
Cost of Equity	19.6%
Average cost of borrowings	9.8%
Post tax cost of debt	6.5%
Debt proportion	23.0%
Equity proportion	77.0%
Cost of Capital	16.6%

4.4 TERMINAL VALUE

Since the valuation is based on going concern entity assumption, we have taken a growth rate of 35.0% p.a. during the period 2020 to 2024 and a growth rate of 15.0% p.a. during the period 2025 to 2029 for valuation of C&S Electric. Post financial year 2029, we have assumed that the company's growth would be in line with expected growth rate of Indian economy.

The terminal value (post 2029 until infinite period) is based on an annual terminal growth rate of 5.0% p.a. The terminal growth rate is based on expected compounded annual growth rate (CAGR) of India's real GDP adjusted for long-term sustainable growth expectation. Accordingly, a terminal growth rate of 5.0% p.a. has been achieved. Using this growth rate, the terminal value has been computed as under:

$$\text{Terminal Value} = \frac{\text{Terminal YrCF} * (1 + \text{Terminal Growth Rate})}{(\text{WACC} - \text{Terminal Growth Rate})}$$

6. SWAP RATIO

The swap ratio has been computed based on the fair value per share of Acquirer and Target entities. Swap ratio is equal to share price of acquirer entity divided by share price of target entity.

On consideration of all the relevant factors and circumstances as discussed and outlined hereinabove earlier in this report, in our opinion, a fair equity share entitlement ratio in the event of merger of JVA Trading Pvt Ltd (Transferor Company) into C&S Electric Ltd. (Transferee Company) would be 0.40 equity shares of C&S Electric of Rs.10 each fully paid for every 1 equity share of JVA Trading of Rs.10 each fully paid, in consideration for merger of JVA Trading with and into C&S Electric. *Applying this ratio, shareholders of JVA Trading will get 5 equity shares of C&S Electric Limited for every 2 equity shares held in JVA Trading Private Limited.*

Note no. 1 - Significant Accounting Policies

I. Basis of preparation

The financial statements have been prepared under the historical cost convention on an accrual basis.

The accounting policies adopted in the preparation of financial statements are consistent with those of previous year.

II. Use of estimates

The preparation of the financial statements in conformity with the generally accepted accounting principles requires estimates and assumptions to be made that affect the reported amount of assets and liabilities and the disclosures relating to contingent assets and liabilities as on the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Management believes that the estimates used in the preparation of financial statements are prudent and reasonable. Differences between the actual results & estimates are recognized in the period in which the results are known / materialized.

III. Revenue recognition

Sale of goods : - Sales are recognised, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides when the products are dispatched / shipped. Sales include excise duty but exclude sales tax / value added tax.

Income from services :- Revenue from erection contracts is recognised based on the stage of completion determined with reference to the costs incurred on contracts and their estimated total costs. When it is probable that the total contract cost will exceed total contract revenue, expected loss is recognised as an expense immediately. Total contract cost is determined based on technical and other assessment of cost to be incurred.

Other income : - Interest income is recognised on a time proportion basis taking into account the amounts outstanding and the applicable rate of interest, dividend income on investments is accounted for when the right to receive the payment is established.

Lease rentals are recognized on accrual basis.

IV. Income-tax

The provision for income tax is computed on the basis of assessable profits under the provisions of the Income-tax Act, 1961. Deferred tax is recognized, subject to the consideration of prudence, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods.

The number of shares used in computing diluted earnings per share comprises the weighted average share considered for calculating basic earnings / (loss) per share, and also the weighted average number of shares, which would have been issued on the conversion of all dilutive potential equity shares. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date. The number of equity shares and potentially dilutive equity shares are adjusted for bonus shares as

VI. Operating Cycle

Based on the nature of products / activities of the Company and the normal time between acquisition of assets and their realisation in cash or cash equivalents, the Company has determined its operating cycle as 12 months for the purpose of classification of its assets and liabilities as current and non-current.

VII. Investments

All long term investments are valued at cost. However, provision for diminution in value is made to recognise a decline, other than temporary, in the value of investments. Current investments are carried at the lower of cost and fair value.
